

FROM THE BACK COVER

We inhabit a divinely created world which has been planned, tested, spoken to and visited by God's angels—and by God the Son. God designed the universe with the world at its heart; humans are very special, made in his image; our Maker is not silent, but speaks to us by his servants and his Son. When you believe that, then you have a very different outlook on life.

Born in Bristol (England), **Nigel T. Faithfull** went to Aberystwyth (Wales) in 1965 as a Christian, aged 22, to read Chemistry. He graduated in Chemistry (BSc & MSc) and obtained a PhD in Analytical Chemistry in 1976, becoming Senior Research Associate in the field of agricultural analytical chemistry. He is author of a handbook on his subject, *Methods in Agricultural Chemical Analysis*, cited worldwide today. His hobbies include photography, woodturning, writing articles on Christian subjects. He and his wife, Eileen, live in active retirement in Wales.
